Subject: Recommendation for No Further Action SWMU 41 – Salvage Yard 2, Naval
Support Activity Mid-South, Millington, TN

Dear Mr. Hill,

The Environmental Protection Agency (EPA) has reviewed the subject document. In 1998 1,2 DCA was detected at one groundwater sampling point. Groundwater samples collected in 1999 and 2004 indicated that constituent concentrations were below laboratory detection limits. The risk assessment did not identify any chemicals of concern in soil. EPA concurs that No Further Action for SWMU 41 is appropriate. EPA also concurs that the four onsite monitoring wells may be abandoned.

If you would like to discuss further or you have any questions, please call me at 404-562-8513.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jennifer Tufts", is written over a horizontal line.

Jennifer Tufts
